Manual Bone Mill, Holding & Drilling Forceps

DD-08-271 Bone Morselizer
Ideal for Chairside Preparation of Autogenous Bone Grafts
Bone Morselizer Bone Morselizer

1. Adjust the spacing screw (located at the hinge of the handles) to the desired spacing requirements between knurled surfaces.

BONE MORSELIZER
The Bone Morselizer is a hand instrument which helps in the crushing of bone material. Follow these steps to prepare properly crushed bone:

Care for your life

2. Place the bone material into the bone well.

3. Compress handles together in order to create pressure on the bone material.

4. Turn the bone morselizer clockwise as the handles are squeezed. Always maintain a slight space between the two knurled surfaces, by using the spacing screw.

5. To remove bone, press the T-handle and bone will express from the bone well.
